### **DETAILED ACTION**

1. This Office Action is in response to the amendment filed on 8/10/2009. Claims 1-13 have been amended.

#### ***Claim Objections***

2. Claim 8 is objected to because of the following informalities: The Abbreviation "MAC" is undefined in the claim. See the previous Office Action. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 8 recites the limitation "the MAC protocol layer" in the claim. There is insufficient antecedent basis for this limitation in the claim.

#### ***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-6 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing (Reference the May 15, 2008

Art Unit: 2112

memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled "Clarification of 'Process' under 35 U.S.C. 101"). The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

Claims 7-12 are rejected under 35 U.S.C. 101 as being directed to method steps which can be practiced mentally in conjunction with pen and paper, therefore they are directed to non-statutory subject matter.

As to claims 7-13, it is uncertain what performs each of the claimed means function. The claim does not define a machine or computer implemented process. Therefore, the claimed invention is directed to non-statutory subject matter.

It is suggested that the applicant add in the claims computer components (i.e., memory, processor... to overcome this rejection.

#### ***Allowable Subject Matter***

7. Claims 1-13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.
